

|  |       |                                  |
|--|-------|----------------------------------|
| Use Case Name: Login to the system   | ID: 1 | Importance Level: High           |
| Primary Actor: User  |       | Use Case Type: Detail, Essential |
| Stakeholders and Interests<br>User - wants to login to the system.   |       |                                  |
| Brief Description: The user needs to login before using the Gemini system.   |       |                                  |
| Trigger: The user wants to use the Gemini system.<br>Type: external  |       |                                  |
| Relationships:<br>Association:User<br>Include:<br>Extend:<br>Generalization:   |       |                                  |
| Normal Flow of Events:<br>1. The user enters the login page.<br>2. The user has an account in the Gemini system.<br>If the user does not have an account.<br>The S-1 : create a new account subflow is performed.<br>3. User input username. |       |                                  |

4. User input password.

If User inputs wrong password

The S-2 : forget password subflow is performed.

5. User enter to system

Subflows:

The S-1 : create a new account

1. User input username.

2. User input password.

3. User input email

The S-2 : forget password

1. User request OTP

2. User input OTP

4. User set new password

Alternate/Exceptional Flow:

|--|-------|----------------------------------|
| Use Case Name: Submit a Science Plan   | ID: 2 | Importance Level: High           |
| Primary Actor: Astronomer  |       | Use Case Type: Detail, Essential |
| Stakeholders and Interests<br><br>Astronomer - wants to submit their science plan  |       |                                  |
| Brief Description: This use case describes astronomer who wants to submit their science plan   |       |                                  |
| Trigger: The astronomer wants to submit a science plan<br><br>Type: External   |       |                                  |
| Relationships:<br><br>Association: Astronomer<br><br>Include:<br><br>Extend:<br><br>Generalization:  |       |                                  |
| Normal Flow of Events:<br><br><ol style="list-style-type: none"> <li>1. Astronomers create a science plan.</li> <li>2. Astronomers test a science plan via the virtual telescope.</li> <li>3. Astronomers submit science plans to the system.</li> </ol> |       |                                  |
| Subflows:  |       |                                  |
| Alternate/Exceptional Flow: science plan has not been tested and the interactive observation   |       |                                  |

|   |       |                                  |
|---|-------|----------------------------------|
| Use Case Name: Create an observing program  | ID: 3 | Importance Level: high           |
| Primary Actor: Science Observer   |       | Use Case Type: Detail, Essential |
| Stakeholders and Interests:<br><br>Science Observer: wants to create observing program  |       |                                  |
| Brief Description: This use case describes how a science observer transforms a science plan to an observing program   |       |                                  |
| Trigger: Science Observer received A created science plan from Astronomer<br><br>Type:  |       |                                  |
| Relationships:<br><br>Association: Science Observer<br><br>Include:<br><br>Extend:<br><br>Generalization:   |       |                                  |
| Normal Flow of Events:<br><br>1. Science observer gets a create science plan<br><br>2. Validate a science plan<br><br>3. Create a observing program from science plan<br><br>4. Submit an observing program to the system |       |                                  |
| Subflows:   |       |                                  |

Alternate/Exceptional Flow:

|  |       |                                  |
|--|-------|----------------------------------|
| Use Case Name: Validate an Observing Program   | ID: 4 | Importance Level: HIGH           |
| Primary Actor: Telescope Operator  |       | Use Case Type: Detail, Essential |
| <p>Stakeholders and Interests:</p> <p>Telescope Operator: wants to validate an observing program</p>   |       |                                  |
| <p>Brief Description: This use case describes how a telescope operator validates an observing program</p>  |       |                                  |
| <p>Trigger: Telescope Operator want to validate an observing program</p> <p>Type: External</p>   |       |                                  |
| <p>Relationships:</p> <p>Association: Telescope Operator</p> <p>Include:</p> <p>Extend:</p> <p>Generalization:</p>   |       |                                  |
| <p>Normal Flow of Events:</p> <ol style="list-style-type: none"> <li>1. Telescope Operator get an observing program for the system</li> <li>2. Telescope Operator validate an observing program</li> <li>3. Submit an observing program to the system</li> </ol> |       |                                  |
| <p>Subflows:</p>   |       |                                  |
| <p>Alternate/Exceptional Flow:</p>   |       |                                  |

|  |       |                                  |
|--|-------|----------------------------------|
| Use Case Name: Install new configurations to the system  | ID: 5 | Importance Level: High           |
| Primary Actor: Supporter   |       | Use Case Type: Detail, Essential |
| <p>Stakeholders and Interests:</p> <p>Supporter–wants to install new configurations to the system</p>  |       |                                  |
| <p>Brief Description: This use case describes the process of installation and configuration with support.</p>  |       |                                  |
| <p>Trigger: new or updated configurations.</p> <p>Type: Internal</p>   |       |                                  |
| <p>Relationships:</p> <p>Association: Supporter</p> <p>Include:</p> <p>Extend:</p> <p>Generalization:</p>  |       |                                  |
| <p>Normal Flow of Events:</p> <ol style="list-style-type: none"> <li>1. Proposal to special equipment to Gemini</li> <li>2. Support validated installation and configuration</li> <li>3. Install new configurations to the system</li> </ol> |       |                                  |
| <p>Subflows:</p>   |       |                                  |

Alternate/Exceptional Flow:

1. The installation is unable to be installed; the installation is rejected
